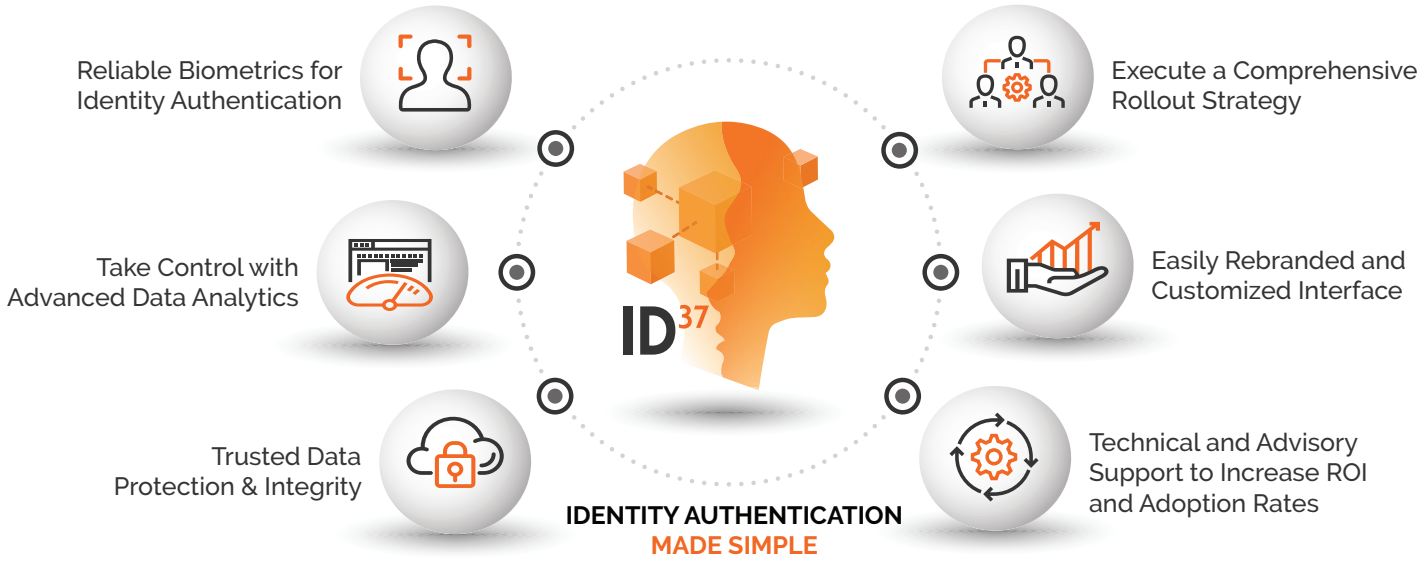
IS YOUR PAPER-BASED PROOF OF LIFE PROCESS UNRELIABLE AND TIME CONSUMING?

SOLUTION BENEFITS



NovuGens ID37 Biometrics Solution provides the ability to quickly and easily enroll thousands of individuals via a lean and user-friendly mobile solution, which captures a baseline of a selfie, voice, and liveliness on both iOS and Android.

BIOMETRICS | **MOBILE APP** | **ANALYTICS PORTAL**

HOW WE DO IT

NovuGens

MOBILE CAPABILITIES

- Face Recognition (Selfie)
- Passport & License Scanning
- Voice Recognition
- Liveliness Recognition
- Interactive Voice Response (IVR)
- 3rd party - AML and KYC
- Passcode
- Face ID
- Touch ID

BIOMETRICS

Our Biometrics capabilities and architecture have been built to ensure data protection, GDPR regulatory compliance and scalable yet flexible architecture that can be easily adapted for clients with a few thousands or millions of users. Data encryption at all levels is paramount to our success.

MOBILE APP

The Mobile Application provides an easy accessible way to ensure "Digital Proof of Life" compliance anytime and anywhere. FIDO architecture standards are implemented to ensure data protection and compliance. Enroll in less than 3 minutes and complete a "Proof of Life" in a matter of seconds.

ANALYTICS PORTAL

The Analytics Portal allows you to quickly and efficiently monitor "Digital Proof of Life" compliance at a global, region, country or individual level. Both Enrollment and Authentication transactions are audited ongoing to ensure compliance is achieved. The portal serves as a central repository of analytics which is key during audits.

HOSTING OPTIONS

- On Client Cloud
- Software as a Service (SaaS)
- amazon web services
- On Client Premise
- Hybrid Solution
