

# SECURITY, REGULATORY COMPLIANCE & DATA PROTECTION ARE TOP PRIORITY

## OUR CAPABILITIES

We leverage Biometrics, Data Analytics, industry platforms and other emerging technologies to build exceptional market products.

**SECURITY**

**COMPLIANCE**

**ARCHITECTURE**

# HOW WE DO IT

NovuGens

## MOBILE CAPABILITIES

Face Recognition (Selfie)

Passport & License Scanning

Voice Recognition

Liveness Detection

Interactive Voice Response (IVR)

3rd party - AML and KYC

Passcode

Face ID

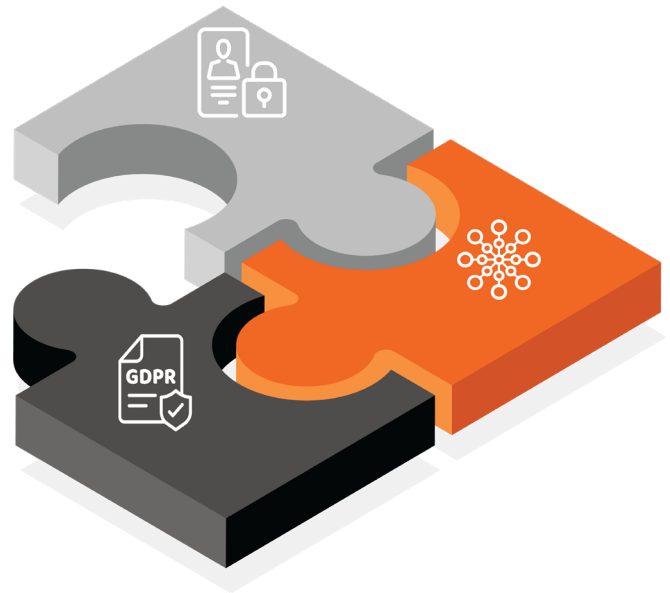

Touch ID

## SECURITY

Security is our top priority at all levels. We leverage new FIDO standards to ensure data transmissions are encrypted on all transactions. All biometric data captured via the mobile application is stored and encrypted within a secured biometrics server.

## ARCHITECTURE

Solution Architecture is extremely flexible so it can be easily implemented for thousands or millions of users. To address your data protection concerns or risks, we offer a variety of hosting solutions to meet your needs.

## COMPLIANCE

Compliance with GDPR and other regulations is of utmost importance. Biometrics data is always encrypted at a database level, and API calls to internal client application eliminate the need for capturing and storing personal identifiable information (PII).

## HOSTING OPTIONS

On Client Cloud

Software as a Service (SaaS)

On Client Premise

Hybrid Solution
